VAPORIZATION

Vaporizers are a great way to inhale marijuana without any of the smoke toxins, since it is heated but not combusted.

> VAPORIZATION

TABLETOP VAPORIZERS

Generally considered "stay at home" vaporizers these accessories provide patients with an improved flavor, durability, longevity, and ease of maintenance.

PORTABLE VAPORIZERS

Make for a portable and quick way to consume concentrates and flower for patients who are always on the go. Convenience is key with these vaporizers.

VAPE CARTRIDGES / PENS

These cartridges come with pre-filled ceramic containers containing marijuana oil that's ready to be used by attaching a battery or in the case of pens it's ready for use the moment you open it with an all in one cart and non-removable battery that is discarded once it's complete.
